1. Applicant's RCE has been received and entered. The pending claims in the application are 1, 4, 9, 11-14, 17 and 20-37, which are in allowable condition.

### **REASONS FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance:

As regards to claims 1 and 4, the prior art of record does not teach or suggest a method for obtaining spatial information about an object, including steps of using a plurality of measured resonant transverse magnetic modes to obtain spatial information about positions of the measured transverse magnetic modes comprising using a Fourier Bessel transform, in combination with the remaining limitations of the claims.

As regards to claims 9 and 11-14, the prior art of record does not teach or suggest a method for measuring the dielectric constant of an object, including steps of using the plurality of measured resonant transverse magnetic modes and the spatial information to obtain the dielectric constant information and dielectric constant for the object, in combination with the remaining limitations of the claims.

Claims 17 and 20-37 are allowed, as the prior art of record does not teach or suggest an apparatus for measuring the dielectric constant of an object, including a cavity having a height  $h$  and a radius  $R$ , and ratio of the height  $h$  and the radius  $R$  is selected to cause the resonant frequencies to be distinct from one another, in combination with the remaining limitations of the claims.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
